UHF CONNECTORS FOR 1/2" HARDLINE

recognized that there was a void in the market created when Andrew® discontinued the UHF connectors for their 1/2" Heliax® cable.

To fill that void, RF Industries has released two high quality UHF connectors. These UHF connectors utilize the same installation process and tooling required for the discontinued connectors they replace.

Manufactured with a White Bronze Plated Brass body, Silver Plated Phosphor Bronze contact and PTFE dielectric, these connectors offer high conductivity, low (IM) intermodulation, and are resistant to tarnishing.

Both of the UHF connectors are compatible with 1/2" cables from Andrew®, Eupen Cable, Inc., and RFS - Radio Frequency Systems.

Davis RF is now stocking both of these connectors and they are available either as replacement parts or we can provide them professionally installed on new custom cable assemblies.

PART NUMBER	YOUR COST
RFU-502-H1 UHF (MALE) CONNECTOR	\$34.60 EACH
RFU-520-H1 UHF (FEMALE) CONNECTOR	\$34.60 EACH
